

WC-8-DM Kit (Deluxe Dry Method Kit)

Western's MPI Kits are offered in a great variety of configurations. Our Deluxe Dry Method Kit is offered in our standard #4 Case, which is the same case that a WC-8 Kit is shipped in (Yoke, Battery, and Charger). Our part number for a WC-8 Dry Method Kit is WC-8DM, but we don't ship it in 2 Cases, that's what our competitors would do. Western upgrades a WC-8DM to our standard #6 Case, which allows the extra volume required for the following items in one case;

- WC-8 12VDC Yoke
- Battery Pack (3 options)
- Charger (110 to 240 VAC)
- Field Indicator (Magnetometer).
- Operator Instructions
- Carrying Case (18.5" x 13" x 10")
- Dry Powder Dispensing Bulb.
- 4 x 1 ¾ Pounds (800g) of Grey, Red, Black, and Yellow Dry Powder

The WC-8-DM Kit is Ideal for a field operations company providing remote inspection services or a Large Plant requiring MPI in numerous locations during the inspector's day. A fully self contained and compact WC-8-DM Dry Method Magnetic Particle Inspection weighing only 22 Pounds (10kg).
