SPR-365_{v2}

The W-Series SPR-365_{v2} is a Powerful, rechargeable, high-intensity Longwave (UV A) inspection flashlight featuring the best in LED technology! This second generation light provides 20% more UV output than any competitive models

- Steady-state UV-A intensity of 6,000 $\mu\text{W}/\text{cm}^2$ at 15 in (38 cm)
- 20,000-hour LED service life
- Low visible white light emission less than 0.1 foot-candles (1 LUX)
- Intensity Stabilization assures consistent output between charges.
- Instant-on operation. Lamp reaches full intensity immediately!
- Battery life of 2½ hours of operation between charges of Lithium Ion battery.
- Rugged. Anodized Aluminium body.
- Meets industry UV-A intensity specs For Magnetic Particle Inspection

The SPR-365 UV Lamp makes a great addition to Western's Wet Fluorescent Kit (**W-WF**). It also permits our Self Contained Wet Fluorescent Kit (**W-SWF**) by eliminating the extra case required for the larger Fluorescent Lamps.

The SPR-365 UV Inspection Kit is supplied with; LED Flashlight (w/Battery), Nylon Pouch, Spare Battery, Battery Charger with 12VDC and 115/230 VAC Adaptors, Spot and Diffusing Reflectors, UV Protective Spectacles, Carrying Case, Operator Manual, and Calibration Certificate.
